EDUCATION

GITAM University, Bangalore

B.TECH in Computer Science Engineering

2023 – Present

CGPA: 8.43/10

Class XII – State Board

Sri Narayana PU College

2021-2023

524/600

SKILLS AND CERTIFICATIONS

Languages: C, Python, Java (OOP Basics)

Web Dev: HTML, CSS, Node.js, java servelets

Cloud: AWS

Databases: SQL, MongoDB

Tools/API: VS Code, Git, GitHub, Eclipse, Postman, Firebase

Certifications: Data Engineering Virtual Internship – AWS Academy , Networking Basics(NetAcad), Intro to Java(Coursera)

EXPERIENCE

Data Engineering Virtual Internship – AWS Academy (EduSkills)

2025

- Completed a 10-week virtual internship focused on data engineering concepts and cloud technologies.
- Worked with AWS tools and data processing workflows for cloud-based applications.
- Gained exposure to real-world data engineering practices and cloud environments.

Android Developer Virtual Internship – Google for Developers (EduSkills / AICTE)

2025

- Completed a 10-week virtual internship focused on Android application development.
- Learned mobile application development concepts and Android development workflows.
- Worked with modern development tools and application design principles.

Data Analyst Intern – SkillCraft Technology | 2026

- Worked on data analysis and visualization tasks.
- Gained hands-on experience with data handling and reporting tools.

PROJECTS

1) Credit Card Fraud Detection System

Machine Learning Project

- Developed a fraud detection system using Random Forest and XGBoost algorithms.
- Worked with a dataset containing over 590K transactions for fraud classification.
- Applied SMOTE technique to handle class imbalance and improve prediction accuracy.
- Achieved ~99% accuracy with strong AUC-ROC performance through model optimization.
- Performed data preprocessing, feature engineering, and evaluation for reliable predictions.

2) AI Research Assistant

LLM-Based Agent

- Built an AI-powered research assistant using Python in VS Code.
- Integrated Wikipedia API for real-time information retrieval and summarization.
- Used LLM models for intelligent response generation and query handling.
- Developed an interactive command-line interface for user interaction.

3) Complaint Management System

Full Stack Web Application

- Developed a full-stack complaint management system using Java Servlets and ReactJS.
- Implemented user authentication including registration and login functionality.
- Built complaint submission and tracking features for students.
- Created an admin dashboard to manage complaints and update complaint statuses.
- Integrated backend APIs with React frontend for smooth data flow and user interaction.

EXTRA CURRICULAR ACTIVITIES AND HOBBIES

- Participated in GITAM Tri-Campus Table Tennis Tournament (2025).
- Team Lead of Security Team for Namma Sportika event held at GITAM University.
- Playing Cricket, table tennis, Football watching movies, and listening to music.
